ClareOne Supported Central Stations

Important: Clare IP alarm delivery is done using SureGuard receivers configured through IPDataTel/Alula.

The Central Station list below has been validated work with ClareOne. To set up Central Station alarm delivery you will need to contact the Central Station of your choice and ask them for account information to deliver alarms from ClareOne.

Please check this list periodically as we are always adding support for additional Central Stations. If you have a Central Station you would like to use that is not included on this list, please contact claresupport@clarecontrols.com.
